

AC PLUS DURABLE MIX

ABOUT US

Ac Plus Durable concrete was designed with the ability to fight multiple problems, such as honeycombing, seepage & cracks, that protect the durability of the structure. Our unique mix design incorporates the right blend of ad-mixtures that ensures fast execution, superior finish and great durability. Choosing Ac Plus Durable enables you to deliver great build quality to your customers with complete confidence. Build durable structures, and remain rest assured that with Ac Plus Durable you are working with the best.

ADVANTAGES

- Our unique formulation of Durable concrete can reduce seepage and cracking by 50%, thereby
- significantly reducing repetitive maintenance and increasing service life.
- Our 20% faster laying time and strength gain reduce construction time.
- Significant reduction in chances of honey-combing.
- Fewer labourers required.
- Higher resistance to cracking
- Increase in service life by upto 30% reduced repairs.

TECHNICAL SPECIFICATIONS

- Flowability – 400 to 550 mm. A good concrete is extremely flowable, without any manual or
- mechanical efforts.
- Water permeability < 15 mm.
- Rapid Chloride Penetration (RCPT < 2000 coulombs)
- Reduction in plastic shrinkage cracking.

APPLICATION AREAS

Walls, foundations, Slabs, Beams and Columns of Building And Infrastructure.
